

# ACTIPASA FAST

## Fermentation activator

### Characteristics

Actipasa FAST is an inorganic fermentation activator that is rapidly assimilated by the yeasts in alcoholic fermentation.

### Application

- **Compensation of nitrogen deficiencies** in the must.
- **Facilitates cell multiplication.**
- Significantly improves medium conditions, **enhancing the viability of yeast populations.**

### Composition

- **Ammonium sulfate and diammonium phosphate.** Sources of rapidly assimilated inorganic nitrogen for amino acid and protein synthesis.
- **Thiamine (vitamin B1).** Activates cell growth. It is a co-enzyme that is fundamental for ketoacid decarboxylation and limits the production of pyruvic acid and acetaldehyde.

### Dosing

**Nutritional supplement for fermentation**      **10 - 30 g/hl**

A 30-g/hL dose of **Actipasa Fast** provides **62 mg/l** Free Amino Nitrogen (FAN).

### Instructions for use

Dissolve the product in approximately 10 times its weight of water or must and add to the vat, making sure that it is homogeneously distributed.

### Physico-chemical properties

pH (1%)	7 - 8
Ash [%]	< 10
Moisture content [%]	< 3
Density [g/cm <sup>3</sup> ]	0,92 - 1,06

### Physical appearance

Fine, white, odourless powder.

### Presentation

1-kg and 25-kg package.

### Storage

Store in original package in a cool, dry, odour-free place.

Use the product as soon as possible after opening.

REGISTRATION: R.G.S.A: 31.00391/CR

Product compliant with International Oenological Codex and EC Regulation No. 606/2009.
