

Safechrome

Liquid preparation

Structuring complex for color stabilization.

CHARACTERISTICS

Safechrome favours an excellent colour-stabilizer.

COMPOSITION

Polyphenol extract from red grape skin (*Vitis vinifera*).

Allergen: Contains sulphites.

DOSAGE

0,5-4 g/l

Caution: It is recommended to perform laboratory tests before application to determine optimal dosage.

INSTRUCTIONS FOR USE

1. Prepare a 1:10 solution of Safechrome.
2. Add to the total volume and mix thoroughly.

Precautions for use:

- ↘ Product temperature to be treated should be >14 °C.
- ↘ If the dosage exceeds 1 g/l, it is recommended to divide it, adding a maximum of 0.8–1 g/l, then mixing thoroughly and waiting 5–6 days. After this period, add the rest of the dosage, being careful not to exceed 1 g/l per application.

PHYSICAL APPEARANCE

Thick, purple liquid.

PACKAGING

5-kg or 25-kg containers.

PHYSICO-CHEMICAL AND MICROBIOLOGICAL PROPERTIES EP 773 (REV.5)

Dry matter [%]	>50
Density [g/ml]	1.23- 1.26
Strenght [UFC/Kg]	1.0- 1.9
pH	< 3.5
SO ₂ [mg/l]	500- 1000
As [mg/kg]	< 3
Pb [mg/kg]	< 2
Hg [mg/kg]	< 1
Cd [mg/kg]	< 1

STORAGE

Store refrigerated (4–8 °C) in the original packaging. Do not expose to temperatures over 15 °C. Avoid direct exposure to sunlight.

Use the product as soon as possible after opening.

Best before: 2 years from packaging.

RGSEAA: 31.00391/CR

This product complies with the UE Regulation No. 231/2012.
